

Embarcadero® All-Access™

On-Demand Tooling for Your Demanding World

EMBARCADERO
TECHNOLOGIES®

Embarcadero® All-Access™ is a powerful product solution that transforms the way you buy and use tools. All-Access lets you focus on the problems and not the tools or platforms. Every All-Access Pass unlocks a powerful tool chest of award-winning, multi-platform Embarcadero products. All-Access makes it easier than ever before to acquire, deploy, use, and manage your software development and database tooling.

INDUSTRY'S MOST COMPREHENSIVE MULTI-PLATFORM TOOL CHEST

In today's constantly changing business and technology environment, optimizing your tooling to match your organization's profile can be difficult. The traditional approach is to go out and buy new tools whenever you need them. This can be time-consuming and expensive, analogous to driving to the hardware store whenever you need a new tool. With All-Access, we simplify it for you. You get instant access to the industry's best tools when and as you need them, in a role-flexible offering.

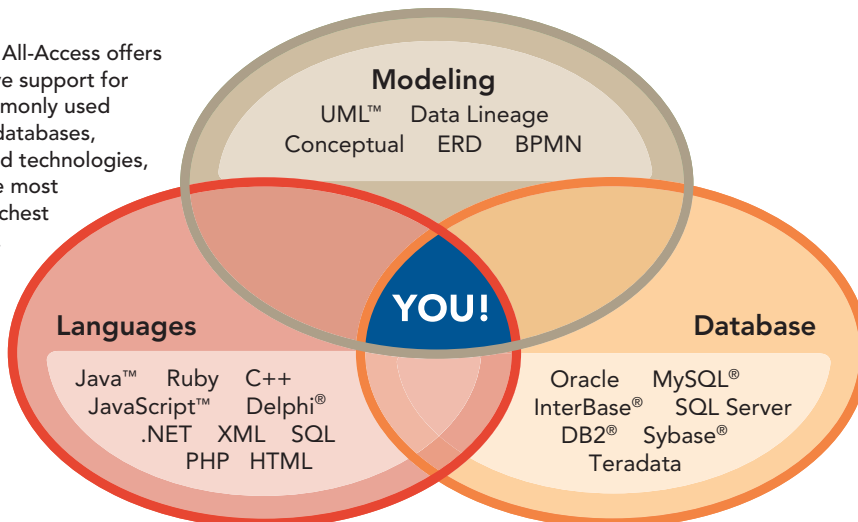

LOW TOTAL COST OF OWNERSHIP. OFF-THE-CHARTS VALUE!

Good software tooling can greatly help to improve user productivity and systems reliability. However, for most organizations, the costs of managing licenses and vendors add up. Staying up to date with all of the latest versions of software can be a great expense, often requiring a complex and time-consuming deployment process. This all adds up to a tremendous opportunity for savings. All-Access gives you improved asset reuse, visibility into your licenses, plus budget predictability, with best-of-breed tooling from a single vendor. One license serves a variety of roles and functions. And with InstantOn, you can deploy new releases in a snap – with zero install and zero hassle – cutting deployment costs to a fraction of what they are today.

EASY LICENSE MANAGEMENT AND ON-DEMAND DEPLOYMENT

License and vendor management can be a monumental challenge, especially in the face of reorganizations, technology changes, and project resource re-allocation. Embarcadero All-Access is a single, easy-to-manage asset, which places a robust and role-flexible collection of products at your users' disposal. This greatly simplifies the effort associated with managing a large collection of a-la-carte products. Included in All-Access are technologies designed to ease the deployment and management of your software assets. It starts with an award-winning software tool chest, then provides you with flexible options for centralized in-house license management, and finally, provides technologies that simplify and centralize the rollout of new software releases.

Embarcadero All-Access offers comprehensive support for the most commonly used frameworks, databases, languages, and technologies, giving you the most versatile tool chest on the planet.

All-Access includes:

- All-Access Client: Lightweight client which provides a primary entry point into the various products included with All-Access.
- All-Access Server: Centrally provisions, manages and updates your All-Access software and licenses inside your own fire.
- The industry's only comprehensive multi-platform tool chest for developers, architects, and DBAs.
- Embarcadero® InstantOn™: A breakthrough technology that gives you installation-free products you simply click and run.
- Perpetual licenses for the products your team relies upon.
- Privileged access to download and unlock products online or onsite, as you need them.
- Access to any new products that may be introduced into your membership level.
- Annual membership that includes support and maintenance to ensure your products are always up-to-date.

Benefits:

- Lowers your TCO for developer, architect, and DBA tooling.
- Reduces the complexity of license acquisition and management.
- Provides the broadest multi-platform coverage available across the languages, frameworks, databases, and technologies your team needs to run your information systems.

	Embarcadero All-Access Levels			
	Bronze	Silver	Gold	Platinum
Application Development	Delphi® Professional	Delphi® Enterprise	Delphi® Architect	Delphi® Architect
	C++Builder® Professional	C++Builder® Enterprise	C++Builder® Architect	C++Builder® Architect
	Delphi Prism™ Professional	Delphi Prism™ Enterprise	Delphi Prism™ Enterprise	Delphi Prism™ Enterprise
